Professional Summary

Frontend Developer with 8+ years of experience building scalable web applications using React.js, TypeScript, JavaScript, Redux Toolkit, REST APIs, and modern frontend technologies. Skilled in building reusable UI components, REST API integration, state management, performance optimization, and cross-browser compatibility. Experienced in Agile development environments with a strong focus on delivering user-friendly, high-performance, and maintainable applications. Proficient in optimizing application performance, improving user experience, and collaborating with cross-functional teams to deliver high-quality software solutions.

Core Competencies

Frontend Development, React.js Development, Single Page Applications (SPA), State Management (Redux Toolkit, Context API), REST API Integration, Performance Optimization, Accessibility (WCAG), Responsive Web Design, Agile Development, Code Review & Mentoring

Skills

Frontend Technologies: React.js, TypeScript, JavaScript (ES6+), Redux Toolkit, Context API

UI Technologies: HTML5, CSS3, SCSS, Tailwind CSS, Bootstrap, Material UI

Tools: Git, GitHub, Bitbucket, Cursor AI, GitHub Copilot, Axios, REST APIs

Practices: Accessibility, Responsive Design, Performance Optimization, Cross-Browser Compatibility, Agile/Scrum

Professional Experience

02/2023 – Present
Gurugram, Haryana

Q3 Technology Pvt Ltd

Sr. Software Engineer

- Developed scalable and responsive web applications using React.js, TypeScript, Redux Toolkit and REST APIs.
- Utilized AI-powered development tools such as Cursor and GitHub Copilot to accelerate code generation, debugging, and development productivity.
- Built reusable UI components to improve code maintainability and reduce development time.
- Implemented API integration using Axios and optimized unwanted API calls using debouncing and lazy loading techniques.
- Improved application performance through code splitting, memoization, and React optimization techniques.
- Collaborated with UI/UX designers and backend developers to deliver user-friendly and high-quality applications.
- Worked on role-based authentication, protected routes, and secure frontend implementation.
- Ensured cross-browser compatibility and mobile responsiveness across multiple devices and platforms.
- Participated in Agile/Scrum meetings, sprint planning, and code review sessions.
- Used Git and Bitbucket for version control and collaborative development.

01/2022 – 02/2023
Gurugram, Harayana

Grouphayport Pvt Ltd

Sr. Software Engineer

- Developed interactive single-page applications (SPA) using React.js, JavaScript, HTML5, and CSS3.
- Managed application state using Redux and Context API for better scalability.
- Created responsive web pages compatible with desktop, tablet, and mobile devices.
- Integrated RESTful APIs and handled asynchronous operations using Promises and Async/Await.
- Worked with reusable components and modular architecture for efficient development.
- Optimized website loading speed and improved SEO performance.
- Fixed UI bugs and enhanced application usability and accessibility.
- Collaborated with cross-functional teams to deliver projects within deadlines.
- Maintained clean, reusable, and well-documented code following coding standards.
- Used Material UI and Bootstrap for responsive and modern user interfaces.

11/2019 – 01/2022
Sultanpur, New Delhi

Teamworkarts Pvt Ltd

UI Developer

- Developed and maintained dynamic websites using HTML, CSS, JavaScript, and React.js.
- Converted PSD/Figma designs into responsive web pages with pixel-perfect UI.
- Implemented form validations and interactive user interfaces for better user experience.
- Worked on browser compatibility issues and frontend performance enhancements.
- Assisted in integrating frontend applications with backend APIs.
- Participated in debugging, testing, and troubleshooting frontend issues.
- Ensured website responsiveness and accessibility standards compliance.
- Used Git for source code management and version control.
- Collaborated with senior developers and project managers during project development.
- Delivered high-quality frontend solutions based on client requirements.

2014 – 2019
Saket, New Delhi

The Webplant Pvt Ltd

Web Designer

- A web development company providing custom solutions
- Designed and developed responsive websites using HTML5, CSS3, JavaScript, jQuery, Bootstrap, Hubspot.
- Built visually appealing and responsive web layouts while ensuring compatibility across multiple browsers and devices.
- Conducted website performance testing, usability improvements, and frontend optimization for enhanced user experience.
- Coordinated with QA teams, managers, and stakeholders to gather project requirements and resolve technical issues.
- Developed clean, maintainable frontend code and contributed to website enhancements and design improvements.
- Create responsive and interactive user interfaces using HTML5, CSS3, JavaScript, and jQuery for seamless user experience across devices.
- Performed browser compatibility testing and debugging to ensure smooth application performance across platforms.

Key Projects

HMC - Tag Application

The Hero MotoCorp Tag Application is a web-based enterprise application developed to manage and streamline vehicle tagging, inventory tracking, employee operations, and workflow management processes within the organization. The application helps improve operational efficiency by providing a secure, responsive, and user-friendly platform for internal teams and business users. The system includes modules for tag management, data tracking, reporting, user management, and operational monitoring with real-time data handling and responsive UI interfaces. The application was designed with modern frontend technologies to ensure seamless performance across desktop and mobile devices.

Technologies: React.js, TypeScript, Redux Toolkit, Material UI, REST APIs, Axios

GJC India

<https://www.gjsindia.org/>

GJS India (India Gem & Jewellery Show) is one of India's leading B2B jewellery exhibition platforms organized by the All India Gem & Jewellery Domestic Council (GJC). The platform connects jewellery manufacturers, wholesalers, retailers, traders, exhibitors, and buyers from across India through large-scale exhibitions, networking events, and business opportunities in the gem and jewellery industry.

Technologies: React.js, JavaScript, Redux, REST APIs, Bootstrap

Banner Buzz

<https://www.bannerbuzz.com/>

BannerBuzz is a global e-commerce platform that provides customized banners, signs, displays, marketing materials, and branding solutions for businesses, events, and promotional campaigns. The platform enables customers to design and order personalized advertising products such as vinyl banners, canopy tents, trade show displays, flags, decals, business cards, and signage solutions through an interactive online experience. The website is designed to deliver a seamless shopping experience with responsive UI/UX, product customization tools, dynamic product pages, secure ordering workflows, and performance-optimized web interfaces across desktop and mobile devices.

Technologies: React.js, JavaScript, Redux, REST APIs, Material UI

Jaipur Literature Festival (JLF)

<https://www.jaipurliteraturefestival.org/>

The Jaipur Literature Festival is a modern digital platform designed to showcase one of the world's largest literary festivals. The platform provides detailed information about festival events, speaker sessions, schedules, venues, books, cultural programs, and ticket registration in an engaging and user-friendly manner.

React.js, TypeScript, Redux Toolkit, Material UI, REST APIs, Axios

Industry Expertise

Enterprise Applications, E-commerce Platforms, Automotive Solutions, Event Management Platforms, Jewellery Industry Platforms, Responsive Web Applications, B2B & B2C Web Solutions

Education

01/2010 – 12/2012	MCA
Prayagraj, UP	IGNOU

01/2008 – 12/2010	BCA
Prayagraj, UP	IGNOU

Achievements

- Improved application performance by 30% through code splitting and lazy loading.
- Reduced API calls by 40% using debouncing techniques.
- Developed 20+ reusable UI components used across multiple projects.
